## ICAP\_XFERMECH

Page 10-197 (PDF page 603)

### Error

A TWAIN driver must support TWSX\_MEMORY and TWSX\_NATIVE, therefore it must use TW\_ENUMERATION when ICA\_XFERMECH is queried using MSG\_GET. Applications must still be prepared to handle TW\_ONEVALUE returns; however any TWAIN 2.2 driver that does this has not passed TWAIN Certification.

### Instructions for change

*Add the red text.*

### Containers

<b>MSG_GET</b>	TW_ONEVALUE (permitted TWAIN 2.1 and earlier) TW_ENUMERATION (required TWAIN 2.2 and later)
<b>MSG_GETCURRENT</b>	TW_ONEVALUE
<b>MSG_GETDEFAULT</b>	TW_ONEVALUE
<b>MSG_SET</b>	TW_ONEVALUE
<b>MSG_SETCONSTRAINT</b>	TW_ONEVALUE TW_ENUMERATION
<b>MSG_RESET</b>	TW_ONEVALUE
<b>MSG_QUERY SUPPORT</b>	TW_ONEVALUE
